Boso no Mura

Become a Dora-mame soybean crop owner?
As an owner, you can participate from the seed sowing until before harvesting. And just before harvesting, the 7,000 yen per approx. 25m² patch you bought will be handed over to you. Harvesting can be done whenever you like. If you harvest the dora-mame in October, you can taste the delicious boiled green bean edamame. And if you harvest in early December, you can enjoy the dried black bean used often for the sweetly cooked bean nimame which is a traditional New Year dish.
